Parsa Zahraei Mohammadabady

647-774-1278 | parsazhr@gmail.com | parsa-zahraei | parsa-zahraei-mohammadabady

Profile

Thesis-based MSc student in Computer Science at Ontario Tech University with a 4.09/4.3 undergraduate GPA and strong preparation in programming, systems, mathematics, and artificial intelligence. Experienced in facilitating learning sessions, adapting explanations to different learners, and providing clear, constructive feedback.

Education

Ontario Tech University — Oshawa, ON
Master of Science in Computer Science, Thesis-Based — September 2026 – Present
- Primary supervisor: Dr. Heidar Davoudi; co-supervisor: Dr. Mehran Ebrahimi

Ontario Tech University — Oshawa, ON
Bachelor of Science (Honours) in Computer Science – 4.09/4.3 GPA — September 2021 – May 2025

Selected Coursework

Discrete Mathematics, Statistics, Probability Theory, Linear Algebra, Scientific Data Analysis, Software Systems Development and Integration, Systems Programming, Artificial Intelligence, Data Mining, Computer Vision and Photography, and Compilers

Teaching and Mentoring Experience

Teaching Assistant — MATH 1850: Linear Algebra for Engineers — September 2026 – December 2026
Ontario Tech University — Oshawa, ON
- Prepared and led in-person tutorials for a first-year linear algebra course
- Facilitated class participation in activities designed to develop mathematical reasoning
- Responded to student questions, clarified mathematical concepts and solution approaches, and advised students on problem-solving strategies for assessments
- Graded student math papers and provided constructive feedback

Junior Youth Group Animator — September 2022 – March 2025
Junior Youth Empowerment Program — Oshawa, ON
- Facilitated group learning sessions and adapted explanations to participants' different learning styles
- Helped participants understand and discuss literacy materials
- Reviewed written responses and provided clear, constructive feedback
- Encouraged participation while maintaining an organized and supportive learning environment

Technical and Instructional Skills

- **Programming:** Python, Java, C, Rust, and JavaScript
- **Tools and frameworks:** Git, Linux, PyTorch, CUDA, PowerShell, and debugging and development environments
- **Course support areas:** programming fundamentals, data structures, software development, systems programming, computer architecture, discrete mathematics, probability, and statistics
- **Instruction:** explaining technical concepts step by step, adapting explanations, reviewing written work, and providing constructive feedback

Selected Academic Projects

Cinemashots – Real-Time Filter Style Transfer | *PyTorch, CUDA, JavaScript* — November – December 2024
- Implemented and trained a CNN-based real-time style-transfer model based on a published research paper
- Configured CUDA training environments and automated training and inference workflows with PowerShell

P2P File Transfer | *Rust, Tokio* — March – April 2025
- Built a peer-to-peer file-transfer application with an emphasis on reliability and error handling
- Diagnosed multithreaded networking issues and tested the application across multiple operating systems
